Comments:

Agriculture needs water of good quality -  
to produce an abundant food supply of equally  
good quality + safety for our population & therefore  
it is imperative that adequate supplies of water  
be <sup>(A)</sup> allocated and stored for the dry years -  
<sup>(B)</sup> Allocated for production so that our food  
supply is assured and  
<sup>(C)</sup> not dependent on imported foods of uncertain safety
